[Future Plans](#)

[Thinking and interest in research](#)

- First of all, in the past six months, I have completed the learning tasks of flip 00 and flip 01.
  - ◆ I learned to use a lot of software on flip 00. Such as: Latex, Github and Smartgit.
  - ◆ In flip 01, I have learned some NLP methods and knowledge.
- In addition, I also completed many graduate foundation courses.

[Future Plans](#)

[Thinking and interest in research](#)

- Master some basic syntax of Python.
- Learn and understand the artificial neural network and machine learning algorithm.
- I think my biggest harvest is understanding and realizing some simple algorithms of artificial intelligence.

- In my submission, machine learning can be divided into the following steps.
  - ◆ Problem definition.
  - ◆ Data collection.
  - ◆ Data visualization.
  - ◆ Data cleaning.
  - ◆ Model establishment and optimization.
  - ◆ summary.
